*Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-27, 37, 38, and 40-50, drawn to transmitting encoded and non-encoded bits, classified in class 375, subclass 295.
  - II. Claims 28-36, 39, 51, and 52 drawn to decoding which comprises identifying a first set of bits and a second set of bits and processing the bits, classified in class 714, subclass 709.
2. The inventions are distinct, each from the other because of the following reasons:

Group I refers transmitting sets of bits on a bus, wherein the sets of bits may be transmitted in an encoded or non-encoded format. Group II refers to decoding bits which comprises identifying bits based on a marker bit which separates the bits and processing (reconverting) the identified bits.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 2611

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
